(510) Audio and video recording systems featuring network management functionalities, namely, Internet digital video recorders, networked digital video recorders, audio and video streaming devices; broadband communication equipment, namely, networking routers and networking switches; broadband wireless equipment, namely, base station equipment for wireless and fixed networking communications applications in the nature of wireless access point devices; broadband wireless equipment, namely, telecommunications base station equipment for cellular, wireless and fixed networking and communications applications; call management apparatus comprising computers and computer software for processing and routing calls; camera system comprising of video camera and software to remotely access the video camera through web browser; carrier class wireless point-to-multipoint radios; cloud controlled device in the nature of computer hardware, platform in the nature of computer operating system and software for managing and controlling advertisements on screens, monitors and electronic displays; communications and data networking hardware, namely, devices for transporting and aggregating voice, data, and video communications across multiple network infrastructures and communications protocols; communications software for connecting users on wireless networks, computer networks, and information technology (IT) systems; computer firmware for wireless communication devices; computer hardware for use in network management; computer networking hardware; Computer operating programs and computer operating systems; computer software for communicating with users of hand-held computers; computer software for wireless content delivery; computer software for administration of computer networks and information technology (IT) systems, for administration of video, voice, and data transmission, for connecting radio networks, for setting up and configuring local area networks, for setting up and configuring wide area networks, for use in network management, for connecting users on wireless networks, for connecting computer network users, for communicating with users of hand-held computers, for controlling and managing access server applications, for management of communication equipment, for wireless content delivery, for controlling the operation of an antenna system, for synchronizing GPS clocks in antenna systems, for communication in the nature of providing transmission of data between two points and data networking services; computer software for administration of computer networks and information technology (IT) systems, for connecting radio networks, for setting up and configuring local area networks, for setting up and configuring wide area networks, for changing radio channels at given intervals that may be downloaded from a global computer network, for use in network management, for connecting users on wireless networks, for connecting computer network users, for communicating with users of hand-held computers, for controlling and managing access server applications, for management of communication equipment, for wireless content delivery, for controlling the operation of an antenna system, for synchronizing a GPS clock in an antenna system, for telecommunications and data networking services; communications software for connecting users on wireless networks, computer networks, and information technology (IT) systems; computer software for communicating with wireless access points; devices for wireless radio transmission, namely, wireless access point devices; devices for wireless radio transmission; digital display management systems, namely, computer hardware and software system for managing electronic displays in the nature of digital signage; digital media receivers; digital media streaming devices; digital video recorders; display monitor operating software; downloadable network operating software; downloadable software for administration of computer networks; downloadable software for scanning of WiFi networks, discovery of devices on a WiFi network, mapping of WiFi signal levels, providing WiFi network status information, conducting WiFi speed tests, and providing VPN access; electrical plug device enabling connection and disconnection of power; electrical plug device enabling connection and disconnection of power; power cables; redundant power supply to provide backup power; electronic control systems for devices, namely, controllers to monitor and control the functioning of other electronic devices; electronic storage device, namely, blank flash drive, memory media, hard drive, and storage subsystems for storage and backup of electronic data either locally or via a telecommunication network; electronic transmitters and receivers for wireless networks, namely, transmitters and receivers of electronic signals in the nature of wireless access point devices; electronic transmitters and receivers for wireless networks, namely, transmitters and receivers of electronic signals; electronic video door bells with two-way audio communication; encoding and decoding apparatus and instruments; wireless radio transmitters and receivers; industrial wireless point-to-multipoint radios; Ethernet networking devices; interoperable communication systems designed to provide wireless internet, namely, wireless access point devices; IP (Internet Protocol) cameras; microwave antennas; radio antenna; microwave transmission apparatus for delivering audio visual content, software, and data; microwave transmission apparatus for delivering wireless content, radio programs and messages; network access server hardware; network video recording software for IP (Internet Protocol) video surveillance; network-based video recording hardware, namely, cameras, video recorders, electric doorbells; outdoor radio receivers and transmitters used

as part of an outdoor wireless network; outdoor wireless transceiver radio used as part of an outdoor wireless network; power adaptors; power cables; power switches; radio devices, namely, devices for outdoor wireless radio transmission as part of an outdoor wireless network; Radio devices, namely, devices for wireless radio transmission; radio receivers and transmitters; redundant power supply to provide backup power; remote control telemetering machines and apparatus; remote controlled devices, namely, sensors, switches, door access devices, power controllers, and power strips; Network controlled door access security devices; security and surveillance video cameras and recorders; software for management and control of display monitors; surveillance system comprising of video camera and software to remotely access the video camera through remote internet access; computer hardware for IP video surveillance; telecommunications and data networking hardware, namely, devices for transporting and aggregating voice, data and video communications across multiple network infrastructures and communications protocols; telecommunications and data networking hardware; telecommunications call management software for originating, processing and routing calls to telecommunication carriers and other telecommunication service providers; telecommunications equipment, namely, inbound and outbound telecommunications call management apparatus comprising computers and computer software for processing, routing calls, and distributing voice and data telecommunications; telecommunications equipment, namely, network controlled power switches; telephones; video cameras; wired and wireless communications devices for voice, data or image transmission; wireless access point (WAP) devices; wireless communications devices for voice, data or image transmission; wireless point-to-multipoint radios; wireless transceiver radio; wireless transmitters and receivers, namely, wireless access point devices; wireless transmitters and receivers; LED lighting
